

### **Amendment to the Claims:**

The listing of claims will replace all prior versions, and listings of claims in the application:

### **Listing of Claims:**

1. (Currently Amended) A media content delivery ~~system~~ service point device, comprising:

a ~~system~~ service point device database for storing a plurality of media files;

a user input device for selecting selected media files from the plurality of media files in said service point device database to be outputted;

an output device for outputting the selected media files;

an external data interface for receiving media files for storage in the ~~system~~ service point device database;

an integrated circuit card interface adapted to hold an integrated circuit card having encoded thereon criteria for accepting the received media files for storage in said service point device database; and

a media content delivery ~~system~~ service point controller, responsive to selection by said user input device of at least one of the selected media files stored in said service point device database, to apply the at least one selected media file to said output device for outputting, and responsive to receipt by said external data interface of media files, to compare each of the received media files received from

the external data interface with the criteria from the integrated circuit card, and the media content delivery service point controller ~~control~~ is further adapted to store in said ~~system~~-service point device database the received media files received by said external data interface which meet criteria on the integrated circuit card held in said integrated circuit card interface; and wherein

the plurality of media files stored by the ~~system~~-service point device database are not stored in the integrated circuit card.

2. (Currently Amended) A media content delivery ~~system~~-service point device as claimed in claim 1, wherein said user input device comprises a keyboard.

3. (Currently Amended) A media content delivery ~~system~~-service point device as claimed in claim 1, wherein said user input device comprises a mouse.

4. (Currently Amended) A media content delivery ~~system~~-service point device as claimed in claim 1, wherein said user input device comprises an electronic interface.

5. (Currently Amended) A media content delivery ~~system~~-service point device as claimed in claim 1, wherein said output device comprises a video output device.

6. (Currently Amended) A media content delivery ~~system~~service point device as claimed in claim 1, wherein said output device comprises an audio output device.

7. (Currently Amended) A media content delivery ~~system~~service point device as claimed in claim 1, wherein said output device comprises an electronic interface.

8. (Currently Amended) A media content delivery ~~system~~service point device as claimed in claim 1, wherein said external data interface comprises a wire connection.

9. (Currently Amended) A media content delivery ~~system~~service point device as claimed in claim 8, further comprising a server connected to said wire connection.

10. (Currently Amended) A media content delivery ~~system~~service point device as claimed in claim 9, further comprising a computer connected to said server.

11. (Currently Amended) A media content delivery ~~system~~service point device as claimed in claim 1, wherein said external data interface comprises a wireless connection.

12. (Currently Amended) A media content delivery ~~system~~service point device as claimed in claim 11, further comprising a server connected to said wireless connection.

13. (Currently Amended) A media content delivery ~~system~~service point device as claimed in claim 12, further comprising a computer connected to said server.

14. (Currently Amended) A media content delivery ~~system~~service point device as claimed in claim 1, wherein said external data interface comprises a compact disc read only memory drive.

15. (Currently Amended) A media content delivery ~~system~~service point device as claimed in claim 1, wherein said external data interface comprises a digital video disc drive.

16. (Currently Amended) A media content delivery ~~system~~service point device as claimed in claim 1, wherein said external data interface comprises a computer disk drive.

17. (Currently Amended) A media content delivery ~~system~~service point device as claimed in claim 1, wherein said integrated circuit card interface is adapted to hold an integrated circuit card having encoded thereon criteria identifying an e-

mail address, and said external data interface is adapted to receive e-mail for the identified e-mail address.

18. (Currently Amended) A media content delivery ~~system~~service point device as claimed in claim 1, further comprising an integrated circuit card having encoded thereon the criteria for accepting media files for storage in said service point device database.

19. (Currently Amended) A media content delivery ~~system~~service point device as claimed in claim 18, wherein the criteria are encrypted.

20. (Currently Amended) A media content delivery ~~system~~service point device as claimed in claim 18, wherein the criteria include an e-mail address.

21. (Currently Amended) A media content delivery ~~system~~service point device as claimed in claim 1, further comprising a kiosk housing said ~~database~~service point device database, said user input device, said output device, said integrated circuit card interface, said external data interface, and said media content delivery service point controller.

22. (Currently Amended) A process of updating files in a ~~system-service point device~~ database of a media content delivery ~~system-service point device~~ including a media content delivery ~~system-service point device~~ controller, said process comprising the steps of:

(a) receiving at the media content delivery ~~system-service point device~~ an integrated circuit card having encoded thereon criteria for selecting media files;

(b) receiving at the media content delivery ~~system-service point device~~ at least one media file; and

(c) comparing the at least one media file received by the media content delivery ~~system-service point device~~ with criteria from the integrated circuit card and if the received media files meet the criteria, storing in the ~~system-service point device~~ database of the media content delivery system media files received at the media content delivery ~~system-service point device~~ which meet the criteria encoded on the integrated circuit card; and wherein

the at least one media file stored in the ~~system-service point device~~ ~~data-base-database~~ is not stored in the integrated circuit card.

23. (Original) A process as claimed in claim 22, wherein step (b) comprises connecting the media content delivery ~~system-service point device~~ to an external data source, and receiving the at least one media file from the external data source.

24. (Currently Amended) A process as claimed in claim 23, wherein step (b) comprises connecting the media content delivery ~~system~~ service point device to the external data source by a wire connection.

25. (Currently Amended) A process as claimed in claim 23, wherein step (b) comprises connecting the media content delivery ~~system~~ service point device to the external data source by a wireless connection.

26. (Currently Amended) A process as claimed in claim 23, wherein step (b) comprises connecting the media content delivery ~~system~~ service point device to a server.

27. (Currently Amended) A process as claimed in claim 23, wherein step (b) comprises connecting the media content delivery ~~system~~ service point device to a computer.

28. (Original) A process as claimed in claim 22, wherein step (b) comprises receiving an audio file.

29. (Original) A process as claimed in claim 22, wherein step (b) comprises receiving a video file.

30. (Original) A process as claimed in claim 29, wherein step (b) comprises receiving a video game.

31. (Original) A process as claimed in claim 29, wherein step (b) comprises receiving a movie.

32. (Original) A process as claimed in claim 29, wherein step (b) comprises receiving a text file.

33. (Original) A process as claimed in claim 32, wherein the text file is a newspaper.

34. (Original) A process as claimed in claim 32, wherein the text file is an e-mail file.

35. (Currently Amended) A process as claimed in claim 22, wherein the media content delivery ~~system~~ service point device includes a compact disc read only memory drive, and step (b) comprises inserting a compact disc read only memory into the compact disc read only memory drive, and receiving the at least one media file from the compact disc read only memory.

36. (Currently Amended) A process as claimed in claim 22, wherein the media content delivery ~~system~~service point device includes a digital video disc drive, and step (b) comprises inserting a digital video disc into the digital video disc drive, and receiving the at least one media file from the digital video disc.

37. (Currently Amended) A process as claimed in claim 22, wherein the media content delivery ~~system~~service point device includes a computer disk drive, and step (b) comprises inserting a computer disk into the computer disk drive, and receiving the at least one media file from the computer disk.

38. (Currently Amended) A media content delivery ~~system~~service point device in accordance with claim 4 wherein the electronic interface comprises:  
a mobile wireless device using a short-range communication link coupling the mobile wireless device to said service point device database.

39. (Currently Amended) A media content delivery ~~system~~service point device in accordance with claim 38 wherein:  
the mobile wireless device uses a Bluetooth link coupling the mobile wireless device to said service point device database.

40. (Currently Amended) A media content delivery ~~system~~service point device in accordance with claim 1 wherein the criteria comprise:  
an identification of at least one type of file which may be accepted for storage in said service point device database.

41. (Currently Amended) A media content delivery ~~system~~service point device in accordance with claim 4 wherein the criteria comprise:

an identification of at least one type of file which may be accepted for storage in said service point device database.

42. (Currently Amended) A media content delivery ~~system~~service point device in accordance with claim 7 wherein the criteria comprise:

an identification of at least one type of file which may be accepted for storage in said service point device database.

43. (Currently Amended) A media content delivery system in accordance with claim 18 wherein the criteria comprise:

an identification of at least one type of file which may be accepted for storage in said service point device database.

44. (Currently Amended) A process in accordance with claim 22 wherein the criteria comprise:

an identification of at least one type of file which may be accepted for storage in said service point device database.

45. (Currently Amended) A process in accordance with claim 23 wherein the criteria comprise:

an identification of at least one type of file which may be accepted for storage in said service point device database.
